

Nokia Core Switch

Overview

The new switches deliver up to 102.6 Terabit Ethernet interfaces, offering double the performance of previous hardware while adhering to Ultra Ethernet Consortium specifications for large-scale AI infrastructures. We offer a comprehensive portfolio of data center switches that can help you implement back-end and front-end networks that meet the demands of artificial intelligence (AI) and traditional workloads. Platforms such as the 7x50 service routers, 72xx IXR switches, and high-performance optical transport systems enable. Nokia will link 30 CoreSite data centers across 11 US markets in support of a growing push toward connecting AI and high-performance workloads between Edge environments. 4 Tbps, 650 Group, 7220 IXR H6, agentic AI, AI Infrastructure, AI workloads, AIOps, Alan. Nokia has been selected by American Tower-owned CoreSite to provide IP routing-based Edge and core network solutions for CoreSite's US data centers.
