

OPGW fiber optic cable connector with aluminum casing

Overview

AFL AlumaCore OPGW (Optical Ground Wire) is preferred for its central aluminum pipe and color-coded fiber optic buffer tubes which simplify the splicing process while providing optimum fiber protection as well as long term product reliability. Optical Ground Wire (OPGW) is a dual functioning cable. ly designed for the special requirements of fiber optic overhead cables. We have been developing fittings for fib data transmission in such cables takes place via modulated light pulses. Light pulses are transmitted inside he cables via optical fibers with a total diam-eter of about 300 microns. OPGW is mainly applied in communication line of newly constructed high voltage transmit electricity system with 35 KV or above, or replacement of existing ground wire of previous overhead high voltage transmit electricity system, adding of communication lines and conduction of short-circuit current. Al-covered stainless steel tube OPGW: optical fibers are placed in a hermetically sealed stainless steel tube covered with aluminum layer forms an optical unit.
