What is Fiber Optic Splicing and Why is it Needed?

- #1. Use and Maintain Your. Optical fiber splicing tutorial and splicing precautions
Introduction The preparation of the optical fiber end face includes peeling, cleaning, and cutting these sections. Another method of connecting optical fibers is termination or connectorization, which consists of processing the end of a fiber optic bundle so that it can be connected to other fibers or devices through fiber optic. The optical fiber connection adopts the fusion splicing method. When done poorly, it can lead to significant signal degradation, network downtime, and costly rework.
