

RTX4090 AI Server

Overview

NVIDIA RTX 4090 GPU servers delivering extreme compute performance for AI training, deep learning, rendering, and high-end workloads. Accelerate AI training, rendering, and scientific computing with the power of NVIDIA RTX 4090 — available now through Nodestream's global HPC marketplace. u2028Authorized partner of Supermicro, Dell, HPE, ASUS, Gigabyte, and Lenovo Fill out your specs and we'll match you with the best H200 GPU. The 24 GB cards are the sweet spot: a pair of RTX 3090s delivers 48 GB of total VRAM, enough for a 70B model in AWQ 4-bit quantization with room for KV cache. A single RTX 4090, while faster per-card due to its Ada Lovelace architecture, limits the operator to aggressive 4-bit quantization for 70B. Building your own GPU server with an RTX 4090 or RTX 5090 — like the one described here — enables a high-performance eight-GPU setup running on PCIe 5. This configuration ensures maximum interconnect speed for all eight GPUs. Do. GitHub - autonomous-ai/Personal-AI-Server: A hands-on guide for AI builders: make your own RTX 4090D/5090 GPU server that's fast and efficient.
