

Relay Protection Cabinet Accessories

Overview

With cabling systems, protective hoses, cable feed-throughs, and cable entry systems, control cabinet accessories provide protection and order in and around the control cabinet. In addition, shield clamps enable EMC-compliant wiring. Cabinets and devices of relay protection and automation (RPA) manufactured by Radiy are a modern solution for control, automation, protection, monitoring and signaling at power facilities. This accessory group includes eight series with a broad range of features for protection, safe control, and distribution of electrical power in industrial. These are metal cabinets accessed from both sides, with a front transparent door and rotating rack for fitting in the relay equipment, whereas the back door is non-transparent. Prefabricated components are used for their assembly. Less bulky than electronics cabinets, you can line up these racks to maximize limited storage space. Each rack has two pairs of grounding studs that create a path for static.
