

Should the mezzanine cable tray be installed vertically

Overview

Yes, wire mesh baskets and cable trays can be installed vertically or overhead, and they absolutely should be in many cabling projects. Whether routing Cat 6 cables in a tight riser space or keeping power lines off the floor in a suspended ceiling, these cable support systems offer flexible. There are cable rack systems intended for vertical stacking of horizontal cable runs. I don't have any part numbers off the top of my head. This keeps the cables supported should the cable ties (still, en completely installed, without damage either to conductors or structural system use maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when. NEC Article 392 outlines the key rules for installing and maintaining industrial cable tray systems. These systems, made from metal or plastic, are open structures designed to support electrical conductors, ensuring proper organization and safety. All cables are #10 TC cable with an OD of app 0.
