

Slovakian ONU Optical Network Unit 40G

Overview

SK Broadband announced last week (on the 17th) that it has developed Next Generation-Passive Optical Network 2 (NG-PON2) platform capable of offering up to 40 Gbps Internet speeds and aims to launch a pilot service to seamlessly serve customer traffic that is ever-increasing due. SK Broadband announced last week (on the 17th) that it has developed Next Generation-Passive Optical Network 2 (NG-PON2) platform capable of offering up to 40 Gbps Internet speeds and aims to launch a pilot service to seamlessly serve customer traffic that is ever-increasing due. In response to the telecom industry's need for increased bandwidth, the IEEE High Speed Study Group (HSSG) was formed to commence development of both the 40 GbE and 100 GbE standards. Meanwhile, there has been close liaison between the IEEE and the International Telecommunication Union (ITU). As PON adoption grows, the importance of having a range of Optical Networking Units (ONUs) is even more critical to serve the diverse set of use cases operators are facing. As global demand for Fiber-to-the-Home (FTTH) expands, ONUs have become essential for delivering reliable broadband to homes. MaxLinear's Broadband Forum 247i4 certified PRX SoCs provide a clear path to scale from gigabit to 10G services with a wide portfolio of fiber access solutions. (GPON, XG-PON, XGS-PON, NG-PON2, 10G EPON).
