

Swedish Spectrometer AQ6370B

Overview

With an advanced monochromator, faster electrical circuits, and noise reduction techniques, the AQ6370 series achieves fast measurement speed even when measuring a steep spectrum from DFB-LD or DWDM signals, or when measuring a low power signal from a broadband light source. The AQ6373 and AQ6375 can cover the entire wavelength range from 350nm through 2400nm. With the sharper spectral characteristics of the monochromator, spectral signals in close proximity can be separated. Test Equipment Solutions Ltd specialise in the second user sale, rental and distribution of quality test & measurement (T&M) equipment. We stock all major equipment types such as Spectrum Analyzers, Signal Generators, Oscilloscopes, Power Meters, Network Analyzers etc from all the major suppliers. The AQ6370B uses a newly developed high performance monochromator to achieve high wavelength resolution (0. Whether analyzing DWDM systems or evaluating EDFA with. Temperature condition changes to $23\pm 3^{\circ}\text{C}$ at 0. Liquid crystal display may include few defective pixels (within 0.
