

The distribution box is sealed and durable

Overview

The material of your distribution box affects how safe it is. You want a strong box, so pick metal or fire-resistant plastic. We'll chat about what each one does, where it shines, and then dive into how to choose the perfect box for your needs. Plus, we'll sprinkle in some practical tips to make sure you're not. The groove contours of electronic distribution boxes and the very narrow grooves of micro-distribution housings are seamlessly sealed with the sealing foams of the polyurethane-based FERMAPOR K31 or the silicone-based FERMASIL product families. Since distribution boxes house critical electrical components, they must be designed to withstand various environmental. A distribution box is very important in an electrical system. Key design points include high-quality materials like ABS plastic, aluminum, and stainless steel that resist corrosion and UV.
