

The fiber optic light on the router is still on even when it s off

Overview

If OFF: The router is not powered — check the socket, adapter, or power cable. PON (Passive Optical Network) Normal: Solid light (no blinking). If blinking: Indicates abnormal signal levels. LOS (Loss Of. This guide will walk you through what the LOS light means, why it blinks red and step-by-step instructions on how to resolve the issue, including resetting your router. What Does the LOS Light Indicate?

The LOS light on your router indicates the status of your internet connection to the Internet. The indicators on the router should be lit to access the internet on computers and phones. This. The LEDs on your modem, optical network terminal (ONT), router, or modem/router combo (gateway) are most likely blinking because they're communicating what the device is doing, or there's an error. All networking devices, like modems and routers, provide a row of status lights that represent the. Those blinking lights on your modem and router actually mean something important. Most of us have experienced the frustration of Wi-Fi cutting out during an important call or while streaming our. If your router light is flashing, this means that the service is initialising or that data is being exchanged (i. your broadband service is currently being used).
