

The function of a 24-port LC fiber optic patch panel

Overview

A 24-port LC duplex patch panel is a rack-mounted enclosure designed to terminate and manage fiber optic cables. When building a reliable fiber network, a 24-port fiber optic patch panel loaded with LC duplex adapters is one of the most essential components. It serves as the central hub for organizing, protecting, and managing fiber connections—especially in data centers, telecom rooms, and enterprise.

Maximize the performance of your network with reliable, high-quality fiber patch and adapter panels, fiber enclosures, and fiber cassettes. With our flexible inventory, we'll deliver the right products for your specific network requirements. Choose from a wide selection of customizable, versatile, powder-coated paint finish. Raised slots in the panel base allow for customized. This guide provides a fully updated and industry-ready overview of LC fiber optics, explaining the origin and design of LC connectors, their key features, and the complete ecosystem of LC-based products used in modern networking.
