

The lightning protection device in the distribution box turns red

Overview

If your Surge Protective Device (SPD) window is red, it means the device has failed and is no longer protecting your equipment. It must be replaced immediately. Surge Protection Devices (SPDs) are critical components in any electrical system, especially in industrial, commercial, and residential. Resolution: If the SPD module displays two green status indicator lights while the display panel shows a red phase indicator, proceed with the diagnostic steps outlined in the Troubleshooting Flow Chart below. Need help?

Need help?

Quickly and easily find the right products and accessories for your. The surge protector is equipped with a status indicator window, usually displaying two states: green and red. (Some manufacturers may use different colors to indicate status, it is best to refer to the manual or consult the manufacturer for confirmation.) Green indicator window (OK): If you see a. llowing a lightning strike or surge pulse include, for instance, outlets or cable or oth power lines and data and signal lines are protected using a sur tection device (SPD).
