

The relay protection device won't push up

Overview

The relay will not actuate due to a bad coil. Examine Contacts- Periodically inspect the pitting, burning, or oxidation of contacts. This guide will provide step-by-step instructions on troubleshooting. Symptoms Relay device will not power on Environment/Applies To Relay Devices Resolution Remove the Relay device from its case if one is in use Connect the Relay device to the USB-C charging cable and charging brick that came in the box Plug the. The protection device supervises its normal operation by executing various self-supervision checks during runtime of the device. When detecting any serious faults, the system LED will start flashing alternating red and green. Let's dive into the details to help you diagnose and fix issues with precision and efficiency.
