

What are the strict prohibitions around cable trays

Overview

Despite their versatility, cable trays are not suitable for every situation. They are strictly prohibited in hoistways or any location where they could face severe physical damage. These systems, made from metal or plastic, are open structures designed to support electrical conductors, ensuring proper organization and safety. Here's what you need to know: Cable Types: Only use. The distance between trays affects not only the ease of maintenance but also cable protection, heat dissipation, and system stability. Armoured or metal-clad cables (where allowed) laid in trays. 305(a)(3), or comparable standards promulgated by States operating OSHA-approved State plans. In addition, this document contains several references to provisions of the National Electric Code.
