

What material is the combined distribution box made of

Overview

You can find distribution boxes made from various distribution box materials such as steel, aluminum, PVC, polycarbonate, high-density polyethylene, and thermoset plastics like SMC. Each distribution box material has its own special strengths. It ensures safe power management and includes protective elements such as circuit breakers or fuses to guard against overloads. Whether it's a home, office, or factory, the DB box makes sure power. A Combined Distribution Box isn't just one simple box; it's more like a mini-command center. Inside, you'll find: Busbars: These are metal strips that conduct electricity. Reasons for material selection: The strength and corrosion resistance of steel plate make it a common material for the box of the distribution box, and its good conductivity also.
