

Where to insert the ceramic ferrule

Overview

They are inserted into the ends of boiler tubes where those tubes meet a tube sheet or refractory wall, and in some designs, they extend a short distance into the tube itself. moreWatch how quickly and easily our ceramic ferrules can be installed. They ensure the drawn arc stud welding process works effectively. Why Are Ceramic Ferrules Essential For Stud Welding?

Without ceramic ferrules, the drawn arc process wouldn't be effective and welds. Ceramic Tube insert also called ceramic ferrule which is inserted into the end of a heat exchanger tube to provide a protective function. The purpose of a ceramic tube insert is to either be sacrificial to the effects of inlet-end erosion, corrosion, impingement to induce a fluid to fall on the ID. Ceramic ferrules, often called arc shields, are often used in the drawn-arc stud welding process. Our Custom Ferrules are designed to meet unique requirements for a wide range of.
