

# Which NEMA4X communication temperature control cabinet is better

2. Imported design is convenient for expansion.

The design of two inlets saves space and allows for rear line entry.

## Overview

The choice depends not only on moisture levels but also on the nature of your operation. Rule of Thumb: If there's corrosive cleaning, condensation, or salt, choose NEMA 4X. NEMA 4 and 4X enclosures both seal out dust and water; NEMA 4X units (often stainless steel, as shown) add robust corrosion resistance. The chart will assist in specifying which enclosure rating is. Nemaco offers world-class outdoor climate-controlled rackmount server cabinets, constructed from durable powder-coated steel and equipped with integrated HVAC (Heating, Ventilation, and Air Conditioning) systems. These enclosures are specifically designed to ensure reliable performance and. These enclosures protect against various hazards that may damage a temperature control panel or make it a hazard in itself. However, NEMA has created a rating system for different enclosure types. It also prevents the entry of rain splashes and pressurized water streams.
