

Which manufacturer makes the P121 relay protection model

Overview

Schneider Electric's MiCOM P121 relay, with its compact design, flexible configuration, and strong communication capabilities, stands out as a cornerstone in this evolving landscape. MiCOM P12x is a range of directional and non-directional overcurrent relays from single phase or earth fault up to the multifunctional three-phase P127 device with voltage protection functions. Models available: MiCOM P120, MiCOM P121, MiCOM P122, MiCOM P122C, MiCOM P123, MiCOM P125, MiCOM P126. Any agreements, commitments, and legal relationships and any obligations on the part of Schneider Electric including settlements of warranties, result solely from the applicable purchase contract, which is not affected by the contents of the technical manual. This device **MUST NOT** be modified. The dual-rated current input is powered by conventional 1A or 5A Current Transformers. Central to this transformation is the seamless integration of advanced protection devices such as the Schneider MiCOM P121 Relay.
